LaCie SAFE Hard Drive

Hi-Speed USB 2.0

TRIPLE SECURITY LEVELS

Armed with three security levels, the SAFE drive features not only biometric access control, which enables locking and unlocking data with a simple fingerprint swipe, but also a secure firmware internal drive lock, which prevents intruders from accessing your important data, even if they remove the drive's casing and plug it into another device. It also comes with a secure chain lock port, for attaching it to your desk to prevent theft (chain sold separately).

BIOMETRIC TECHNOLOGY

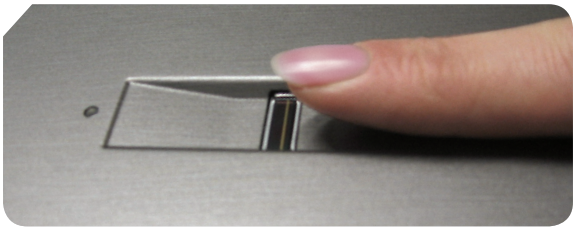
The SAFE drive guards your files with cutting-edge biometric technology. Based on a unique biological user trait, it's far more secure, convenient and user-friendly than password or smart-card protection. Once registered, a simple finger swipe locks and unlocks the drive. At the office, if you have to leave your desk or go to a meeting, just quickly swipe your finger over the sensor to lock your SAFE drive. When back at your desk, swipe to unlock and access your data again.

SAFEGUARD YOUR PRIVATE FILES

The LaCie SAFE Hard Drive with up to 500GB capacity can be trusted for backing up and archiving your confidential folders. Up to 10 fingerprints and up to 5 users can be registered with personal and customized access privileges such as full access to the drive (read/write) or read-only.

IDEAL FOR OFFICE & HOME

The level of protection offered by the LaCie SAFE Hard Drive is ideal for guarding confidential information at work and shielding private files at home. It's perfect for parents who wish to keep children away from viewing content stored on their hard drive or business people who need to store information free from the threats of misuse, unauthorized access and intellectual property theft.



- Secure storage for guarding private files
- Hi-Speed USB 2.0 hard drive for PC or Mac
- Data access control by fingerprint recognition
- Register up to 10 fingerprints, 5 user profiles

FEATURES

- SAFE storage with triple security levels:
  Biometric access control
  Firmware internal drive lock
  Chain lock port (chain sold separately)
- Fast interface transfer rate: up to 480Mbits/s
- Easy to install & use

BOX CONTENT

- LaCie SAFE Hard Drive
- Hi-Speed USB 2.0 cable
- External AC power adapter
- CD-ROM with User Manual
- Quick Install Guide

SYSTEM REQUIREMENTS

- Windows® 2000/XP; Mac OS 10.2 or higher
- Pentium® II 350 MHz / PowerMac® G3 or greater
- Minimum 128MB RAM
